**Most of the 1 DVD Games (in the 2000's) are originals recorded on LP (4 Hrs). They lack the quality of a 2 DVD game recorded on EP (2 Hour) and show distortion when the camera is zoomed out. They are usually rated at B-/C+ and state (Good Quality) (Fair Quality) (Slight Distortion) depending on the game. They are worth watching, but the video isn't the greatest quality. Sound on these DVDs are great.
